Brake Proportion Valve Relocation Kit

CONTENTS

Part Number	Qty	Description
3758990	1	Brake proportion valve relocation bracket
6151021	1	Bolt M8x1.25x20
6151032	1	Nut M8x1.25 Nyloc
4581044	2	Washer flat 8mm
4581046	1	Washer spring 8mm

INSTALLATION PROCEDURE

Remove bolt that secures brake proportioning link to axle housing.

Tools:
12mm spanner

Fit relocation bracket to mount on axle housing with M8 x 20 bolt, spring washer and flat washer supplied.

Tools:
13mm spanner

Fit link to relocation bracket using original bolt. Secure with flat washer and nyloc nut supplied.

Check the position of the bracket on the end of the link.

As shown by the photo, the distance from the underside of the bracket to the centre of the bolt on the axle housing should measure 210mm.

Tools:
12mm & 13mm spanners

Complete brake test procedure using VBT101 brake tester as per any suspension fitment.
